

CAR ACCIDENT SEVERITY IN NEW YORK

Every Life on this planet is very much valuable for someone or the other. This problem is about numerous car accidents that occur in our daily lives. People should be more careful while driving the car. Every second, many people across the world will be losing their lives on the road.

Their family members will be waiting for them in their home. In this project We will be analyzing the car accident data, how the accidents are caused generally. What to do to mitigate accidents. Weather and temperature also might affect the environment.

Driving during night times is too risky. In countries where there will be snowfall, It will be very difficult for the driver to drive the car.

Requirements:

1. What is the severity rate?
2. On what dates, accidents happened more ?
3. On what dates, accidents happened less?
